

IdeaSprint 4.0 — Change Requests

Source: handwritten notes Ideasprint-4.0-Changes.pdf (11 pages), transcribed into structured form, plus follow-up clarifications given by the owner.

Status: final — ready for implementation.

Nothing here has been invented or inferred. The single item marked [CLARIFY] (item 26) still needs input and should not be guessed at.

Terminology: "Admin" and "Super Admin" refer to the **same role**. Wherever the notes say one or the other, treat it as the same single privileged role — there is no separate lower-tier admin. The other distinct role is **SPOC** (assigned to a room), and **zone manager** (item 11).

Room assignment (page 1 of the notes)

Doubt: How & when to assign rooms

Answer:

- Rooms are assigned by the **Admin / Super Admin** (same role).
- **When:** after team registrations are closed, and before the hackathon begins.

Room module must contain:

- Add room option
- Add teams into that room option

Related: SPOC is attached to a room, not to a person/team (item 11), and the SPOC derived from the room number must be shown on team pages and all attendance pages (item 9).

1. Home page — remove the domains section

- **Supersedes the earlier request.** The original note said domains should be rendered all at once instead of the current scrolling animation. That is no longer wanted.
- **Remove the entire domains section from the home page.**
- Domains are being dropped as a concept, so the "filter by selected domain" entry has also been removed from item 10.

2. Filters

- Add filters. (Full list detailed in item 10.)

3. Home page — white space

- Reduce the number of white spaces throughout the landing/home page, between sections.

4. Prize money

- Changed to: 1st place — 20K, 2nd place — 15K, 3rd place — 8K.

5. Remove food

- Remove food (i.e. no food is provided).

6. Main points to be displayed

To be displayed in addition to the existing ones:

- NOC
- Team size
- FCFS
- PS (problem statements) will be released on the hackathon day

7. "Talk to us" section

- The 4 contacts should be rendered horizontally in a single line.

8. Credit line

- Display the credit as: "Developed by MDC GITAM" (MDC = Meta Developer Community, GITAM).
- Use this exact casing.

9. Downloads

- Team-wise download and all-members download — in every page where downloads are possible.
- Downloads are a must for every filter.

Each download must contain:

- Reg. number
- Roll number
- Year of study
- Team name
- Team lead
- Who is the SPOC
- Room number

Additional:

- Search bar, if possible — **only for SPOC & Admin/Super Admin.**

SPOC assignment rules (written under item 9)

- SPOC assignment is done by the **Admin / Super Admin** (same role), and he can change it whenever he wants.
- The assigned SPOC (according to the room number) should be shown in:
 - the team pages
 - all the attendance pages

10. Filters (detailed)

- Filter by year
- Filter by SPOC / room
- Filter by gender
- Filter by problem statement
- Filter by zone
- Filter by team size

11. Additional powers to Super Admin

- Able to edit team details
- Group rooms as **zones**
- Assign / edit **zone managers**
- Problem statement edit choice for a team
- Display all problem statements
- SPOC can be assigned to a **room only**, not to a person/team.
 - They should automatically be assigned to all the teams/people in that room.
- **Delete teams, members and SPOCs.**
- **Complete access to the website** — Super Admin can do anything he wants (no restricted areas).

12. Attendance module

- Must be polished and standard.
- Should be **team-wise**, and can be taken by either **SPOC or Admin/Super Admin.**
- Each session should have an **export as CSV / Excel** option.

13. Downloadable components

- Every component related to participants / teams / problem statements assigned / SPOCs should be downloadable.

14. Food option

- Completely remove the food option.

15. UI polish — admin dashboard

- Currently it looks like tabs.
- It would be better to have a **grid of cards** — each card for each tab, with an icon.

Sketch from the notes:

Currently:

Tab1 Tab2 Tab3 Tab4 ...

How we want:

[icon] Tab1	[Tab2]	[Tab3]
[Tab4]	[Tab5]	[Tab6]

16. Exit form

- Exit form is **not a mandatory submission**. It is only for teams who want to exit in between.

17. NOC form during registration

- During registration, provide the **link or PDF of the NOC form**, so that it can be filled by the parents.
- Teams can submit both **physical and online copy**.

18. Team dashboard changes

- **Change the font** used in the Team id - - - Registered element.
 - Reason: in the current font, the **zero renders with a dot/dash through the middle** (slashed/dotted zero), which looks bad.
 - Fix: switch to a font whose zero has no slash or dot.
- Remove the extra white space present at the **top of the page**.

19. Login page

- Feels very blank/empty. Add some background or a container behind it so it doesn't feel that empty.

20. Home page — previous year images section

- **Problem 1:** The heading of the section should be renamed as "IdeaSprint 3.0".
- **Problem 2:** The image carousel is not working — some sort of glitches occur.

21. Footer navigation

- The navigation links in the footer section are not working.

22. Privacy policy link

- Clicking "Privacy Policy" in the footer opens the privacy policy, but the page is scrolled down and has to be scrolled up.
- It should open **directly at the top** (#top).

23. Privacy policy editing

- Super Admin should have **direct access to modify & edit the privacy policy** from the dashboard.

24. Section-wise animations

- The section-wise animations are the reason for the extra white spaces — **reduce them**.

25. Team size

- Team size → 3 or 4
 - 3 → 1 team lead + 2 members
 - 4 → 1 team lead + 3 members

26. Supabase → frontend connectivity (backend-to-frontend sync)

Expected behaviour: When anything is changed or updated in Supabase, that change should reflect in the frontend.

Current problem:

- The Supabase-to-frontend update is **too slow**.
- An error is also being thrown related to this.
 - [CLARIFY] The exact error message / console log / affected screen has not been shared yet. Claude Code should be given the actual error text (browser console or Supabase log) rather than guessing the cause.

Scope for Claude Code: review and fix the backend-to-frontend data connectivity so Supabase changes propagate to the UI reliably and without noticeable delay.

Clarifications confirmed by the owner

Item	Clarification
Item 4	20K = 1st, 15K = 2nd, 8K = 3rd
Item 8	Credit text is "Developed by MDC GITAM"
Item 18	Change the font because the zero renders with a dot/dash through it; pick a font with a plain zero
Page 1 doubt	Super Admin assigns rooms after registrations close and before the hackathon; module needs add-room and add-teams-to-room
Item 1	Domains section removed entirely from the home page (supersedes "render all at once")
Item 10	"Filter by selected domain" dropped, since domains are removed
Roles	"Admin" and "Super Admin" are the same role — not two privilege tiers

Still open: the exact error text behind item 26. Everything else in this document comes from the handwritten notes or from the owner's direct answers above — nothing has been assumed.
